

Docket No. 743459-24

Serial No. 10/566,174

Page 2 of 11

**Amendments to the Specification:**

Please amend the paragraph beginning on page 5, line 8, of the Specification as follows:

-- Preferably the user interaction devices are provided with processing software for computing entitlements from said transaction data and recording said transaction data and entitlement or rewards data in said user interaction device[[,]] and ~~for recording said transaction data in~~ said tokens and said tokens are presented at said user interaction devices in the course of a transaction or activity. --

Please amend the paragraph beginning on page 6, line 23, of the Specification as follows:

-- Preferably at least some of said user interaction devices are configured to transmit to said server said token transaction data and associated reward data corresponding both to an instant transaction and one or more previous transactions, thereby providing redundancy in the transaction [[data]] records received by said server. --
